SUBJECT INDEX

ACM elastomer, p. 240
Activation energy, p. 129
Adsorption, water, p. 55
Aging, thermal, p. 27
Amines, p. 288
  cycloaliphatic, p. 323
  polyoxyalkylene, p. 323
Antioxidants, p. 27
  secondary, p. 115
Antiozonant, p. 240
Automotive body parts, exterior, p. 350
BIIR, p. 262
  processability, p. 262
  viscosity, p. 262
Butyl acrylate, vinyl acetate copolymer, p. 192
Carbon black, p. 96
Coatings, p. 323
Co-crosslinking, p. 151
Compatibility of rubber blends, p. 15
Compatibilizers, p. 151
Composites, rubber, p. 203
Compressive strength, p. 363
CR elastomer, p. 240
Crosslinking, p. 178
  co-, p. 151
  water, p. 221
CSM elastomer, p. 240
Diaminocyclohexane, p. 323
Dielectric loss, p. 129
Dihexylene glycol carbonate, p. 221
Dispersion, filler, p. 37
Dynamic mechanical spectrometry, p. 323
Dynamic strain, p. 203
ECO elastomer, p. 240
Elastomer, p. 323
  high performance, p. 221
  microcellular, p. 288
  polyurea, p. 323
  polyurethane, pp. 221, 288, 306
  soft, p. 306
  strength, p. 96
  thermally stable, p. 306
Emulsifiers, p. 363
Emulsion polymerization, p. 192
Encapsulated water, p. 363
EPDM rubber, p. 178
Equilibrium swelling, p. 27
Esterification, p. 288
Ethylene vinyl acetate, p. 203
Failure, high temperature, p. 96
Fatigue, p. 96
Filler
  dispersion, p. 37
  polymer interaction, p. 55
  rubber interaction, p. 37
  water interaction, p. 55
FKM vulcanizates, p. 55
Flame retardancy, p. 363
Gas fading, p. 115
Gel permeation chromatography, p. 383
Glycolysis, p. 288
GUSMER, p. 323
High pressure casting process, p. 221
High temperature failure, p. 96
HNBR, p. 240
Homogeneity, p. 15
Homopolymer, p. 192
Hydrogenated NBR, p. 240
Hydrolysis, p. 288
Hydrolysis resistance, p. 221
In-phase modulus, p. 203
Interpenetrating polymer networks, p. 337
Ion exchange resin, p. 363
Irradiation, p. 151
Isophorone diamine, p. 323
Latex paint, p. 192

(continued)

Subject Index (continued)
Latex paint *(continued)*
mechanical properties, p. 192
physical characteristics, p. 192
Latex polymer, p. 192
LLDPE, p. 151
Loss tangent, p. 203
Melt viscosity control, p. 115
Microcellular elastomer, p. 288
Modulus
in-phase, p. 203
out-of-phase, p. 203
m-TMXDI, p. 323
Naphthalene-1,5-diisocyanate, p. 221
NBR, hydrogenated, p. 240
Network structure, changes in, p. 55
NR, p. 96
Out-of-phase modulus, p. 203
Oxygen index, p. 363
Ozone
crack initiation, p. 240
dynamic test, p. 240
resistance, p. 240
sequential test, p. 240
static test, p. 240
Phosphites, p. 115
Polychloroprene, p. 129
Polyester, pp. 288, 363
styrenated, p. 363
water extended, p. 363
Polyetheramine, p. 323
Polyethylacrylate, p. 37
Polyethylene, p. 178
Polymer
blends, p. 151
chemical resistance, p. 363
latex, p. 192
processability, p. 151
science, p. 129
stability, p. 115
Polymerization, emulsion, p. 192
Polyols, p. 288
high molecular weight, p. 306
low unsaturation containing, p. 306
Polypropylene, p. 115
Polyurea, p. 288
100% solids, p. 323
aliphatic, p. 323
RIM, p. 350
spray, p. 323
Polyurethane, p. 288
Polyurethane elastomers, pp. 221, 288
cast, p. 306
one-component, p. 221
recycling of, p. 288
thermoplastic, pp. 306, 383
waste, p. 288
Poly(vinyl chloride) (PVC), p. 151
Pyridazine derivatives, p. 27
Radiation, gamma, p. 178
Radiation stability, p. 363
Radioactive waste, p. 363
Radionuclide leaching, p. 363
Reactivity ratios, p. 192
Recycling, polyurethane waste, p. 288
Reprocessing, p. 151
Resin
ion exchange, p. 363
thermosetting, p. 363
Rheology, pp. 15, 27, 115
Rigid foams, p. 288
Rubber
composite, p. 203
dynamic mechanical properties of, p. 203
heat resistant, p. 27
styrene-butadiene, p. 337
vulcanizates, p. 96
Rubber blends, compatibility of, p. 115
SAE J200 classification system, p. 240
SBR, p. 96
Secondary antioxidants, p. 115
Silica, p. 37
Silica filler, p. 203
Stability, polymer, p. 115
Strain, dynamic, p. 203
Strength, tensile, pp. 27, 178
Styrene-butadiene rubber, p. 337
mechanical properties, p. 337
morphological properties, p. 337
thermal properties, p. 337
Tearing energy, p. 96
Tensile strength, pp. 27, 178
Thermal aging, p. 27

Thermally stable elastomers, p. 306
Thermosetting resins, p. 363
Transesterification, p. 288
Vinyl acetate, butyl acrylate copolymer, p. 192
Viscosity control, p. 115
Vulcanizates
  BIIR, p. 262
  FKM, p. 55
  rubber, p. 96

AUTHOR INDEX

Abd El-Ghaffar, M. A., p. 192
Abdel-Aziz, M. M., p. 178
Abdel-Bary, E. M., p. 178
Abd-El-Zaher, N., p. 383
Abou Zaid, M. M., p. 178
Aziz, A. W., p. 129
Badran, A. S., p. 192
Barnes, J. M., p. 221
Basu, S. P., p. 96
Becker, J., p. 350
